The quietest wheel in the universe.

LUNAR

A close-up, low-angle shot of a dark, curved surface, likely a wheel or a component of a vehicle. The surface is matte and has the word "LUNAR" embossed on it in a bold, sans-serif font. The lighting is dramatic, highlighting the texture of the material and the depth of the embossed letters. The background is black, making the curved surface stand out.

Sssshhh.

Crash Baggage X Lunar **NEW!**

Lunar - The Wheel

Lunar is the brand of super silent wheels designed for every type of suitcase. A tyre that, thanks to a particular assembly system, generates a natural air chamber inside. This empty corridor between the tire and the rim isolates any noise.

Lunar is a patent:

- Made in Italy
- It uses only 100% recyclable materials
- It reduces vibration and improves ergonomics in carrying the suitcase.

Lunar - The Collection

Icon Lunar is the first collection of Crash Baggage equipped with Lunar wheels. Three different patterns: Sunset, Galaxy and Orion that are inspired, not only in the name of the imaginary of Space. Gradients of colors that bring the mind to the lunar skies and that adapt to the surface and irregular suitcase always in a different way making each suitcase a unique piece.

Backpacks and
ACCESSORIES

Made with **Recycled** MATERIAL

Crash Not Crash, Iconic and Kit Easy Life are the first Crash Baggage collections to be realized from recycled fabrics. Backpacks and travel items designed using a high-quality eco-friendly material, made from recycled PET plastic bottles. The fabrics with which the products are packaged are obtained through recovery and recycling processes of the common PET, which include sorting, washing, grinding and melting of plastic materials in order to transform them into yarns.
