# STORY OF

Functionality is a priority - fun follows close by.  
We strive for our designs to be used, looked at and talked about.

We were established as a glass factory in 1974 and have  
comprehensively evolved into a modern design house.

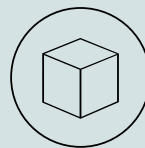

By guarding and developing the know-how that we acquired from  
decades of production experience, we endeavor to learn and master more  
materials. In addition to our brand collection, we create license products,  
starred by some of the most well-known and beloved fairytale characters,  
which take you one step closer to the magical world of stories and adventures.

Fundamentally our roots lie in the Nordic countryside and in the  
Finnish folklore, where everything has a story, and  
nothing is impossible.

## BAGEL

The Bagel is a hybrid between a vase and lantern. The item consists of three separate fitting pieces that can be used to fit your needs. Use the bottom part with your middle part for a smaller candle, or all three pieces to use it as a vase and with taller candles. The bottom part is made of concrete and glass parts from durable borosilicate glass.

## CAPSULE - THE ADJUSTABLE VASE

The Capsule vase is the result of “all-in-one” thinking into the world of vases.  
The two parted handmade vase enables endless combinations starting  
from 18 cm to 28 cm.

## NORDIC

The Northern nature with it's vast wilderness, deep forests and animal inhabitants has inspired the NORDIC- series. Following the clean Scandinavian style, the graphic and simplistic style of the series is a modern illustration of a close bond with nature.

# MOOMIN<sup>®</sup> FOR PETS

by muurla<sup>®</sup>

Our best friends also need their own Moomin series. Muurla's Moomin for pets series consists of essentials that we feel like are the core items to a happy, furry best friend's everyday needs.

Like all Muurla's Moomin products, the pet series is designed with our love for the characters, to be a contemporary and stylish, yet playful and functioning set to fit any Moomin and pet loving home.

By purchasing Moomin Pets product you will support DogRisk - research program

# MUURLA PRODUCT INFORMATION

## ENAMEL - Handmade in Europe

Our enamel mugs feature a soft rim technique, where the mug's sharp rim has been fully bent inwards to create a comfortable surface to drink from. Muurla enamelware consists of a carbon steel core, which is double coated with high quality enamel. All of our enamel products are dishwasher safe. Cooking items are suitable for all stoves - from induction to open fire.

## GLASS

Muurla's glass products are produced out of two different types of glass, depending on the needed functions and intended usage. We use borosilicate glass for items that should be light in weight, yet durable and also resist high temperatures like hot drinks or the heat of candle light.

Products like vases and glass plates are made of lead-free soda lime glass. This ancient, traditional material can be worked in numerous ways to form different sorts of glass items. Most importantly, we focus on having the best soda-lime batches, available together with highly capable glass-workers.

## STORAGE BASKET

Muurla's multifunctional storage basket is made out of recycled PET plastic bottles with a needling technique. The felt-like material is light in weight yet durable. The basket can be used for numerous purposes both indoors and outdoors.

## PLYWOOD - handmade in Finland

Our plywood products - trays and chop&serve boards - are handmade in co-owned factory located in eastern Finland. All wood that is used is Finnish birch - a sustainable choice. Plywood products are coated with a layer of matt melamine for food safety and easy cleaning. Edges are treated with varnish, which makes products dishwasher safe. In addition to producing our own designs, we offer you the chance to let your own designs shine on custom-made plywood products.

## CANDLES - handmade in Europe

Muurla's paraffin candles are formed concave which allows the heart of the candle to burn straight down without melting the outer surface. The decorations on the candles are printed on special paper, which is then placed by hand around the candle. After that, the candle is dipped to paraffin to create a layer that holds the pattern in place. In the final product, the candle light glows softly through the whole pattern, creating a lanternlike appearance.

## SILICONE LIDS

Practical silicone lids prevent spills and enable turning enamelware to take-away items. Lids to enamel bowls allow easy and hygienic storing. Made from dishwasher and freezer safe silicone.
